EASY FAST
Direct Injection ExR

LPG

DIRECTLY THE BEST

Easy Fast D.I. ExR system represents the essence of Lovato's innovation and it has been designed for petrol engines from 2 to 8 cylinders. By selecting components, which perfectly complimented each other, the system is able to guarantee reliability and performance.

Easy Fast D.I. ExR system uses the multipoint sequential injection technology: the injectors, controlled by the ECU, enter the gas into each cylinder and strictly replicate what happens during petrol operations.

Easy Fast D.I. ExR system can convert the latest cars with a direct injection engine. The conversion list of vehicles is available on our website lovatogas.com.

More than 6 million people rely on Lovato to make the planet a better place.

Then what are you waiting for?

LPG MAIN ADVANTAGES

Saving in fuel cost

Toroidal-shaped tanks can be fitted into the space designed to hold your spare wheel and don't take up load space

LPG vehicles fitted with safety devices compliant with UN ECE 67 R-01 regulation can be parked in underground garages, down to the first level

LPG service stations are widely distributed over the country and along motorways
